# Heida

2022  
1250 bottles

Leytron is a well-drained schist and limestone terroir, ideal for Savagnin Blanc. The presence of schist brings minerality and finesse, while the limestone promotes good structure.

---

## Wine

This magnificent grape variety is called Päien in the French-speaking part of Valais and Heida in the German-speaking part. Here, it has floral accents, then develops notes of exotic fruits such as mango and lime. The palate offers magnificent freshness and liveliness. After a few months in the bottle, it acquires more richness, volume and roundness.

---

## Wine-making

Vinification is mainly in vats. Depending on the year, it may also be vinified and aged in casks.
